

LabSpion: Lamp Bracket Model II

The new LabSpion Lamp Bracket Model II is available as an accessory for all existing LabSpion systems. The Model II bracket makes it even easier to attach all sorts of light sources and luminaires to the goniometer.

Advantages

- The detailed hole pattern creates many possibilities for mounting light sources
- Fits all LabSpion models
- Detach the whole bracket and take it to the workshop
- Fast and easy attachment to the gonio tower with two sturdy hooks and two large thumb screws

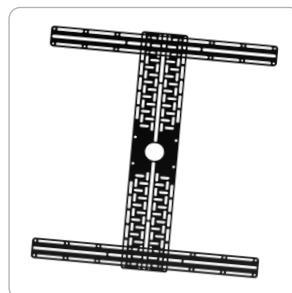

Replace your existing lamp bracket with the new base plate

Hook on your new lamp bracket and tighten the two thumb screws

Having really big light sources to measure? Get the extender set.

Fits all LabSpion versions
