

Your product website: Turn your photometric files into a live product experience.
Generate photometry graphics in real time. Update in one place. Stay current everywhere.

More graphics. Fewer man-hours. Always accurate

- Simplify the workflow from IES/LDT files to graphics and data on your website
- Get LuxiVerse 3D and on-demand sharp graphic, and PDFs with your own design
- Update data and designs in one place only - and see results instantaneously throughout your website
- API-based Viso Live Photometrics generates content in milliseconds from any IES/LDT file

LuxiVerse interactive 3D

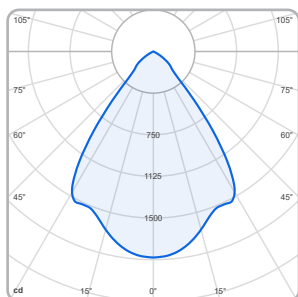

Auto PDF report

Responsive graphics

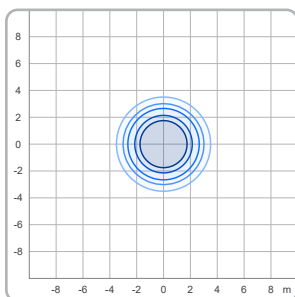

Data extracted from IES/LDT

Your website

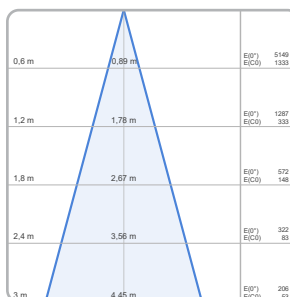

Dynamic reporting
Display your photometric skills to your clients

Your brand identity
You only need a few design templates to define the overall look and feel

Single source of truth
One source for your website product data:
Your LDT/IES files

A unique and interactive 3D experience
The LuxiVerse component

HOW LIVE PHOTOMETRICS WORK

On demand and in your brand: From source data to live photometric content - automatically and in real time.

Create more. Manage less.

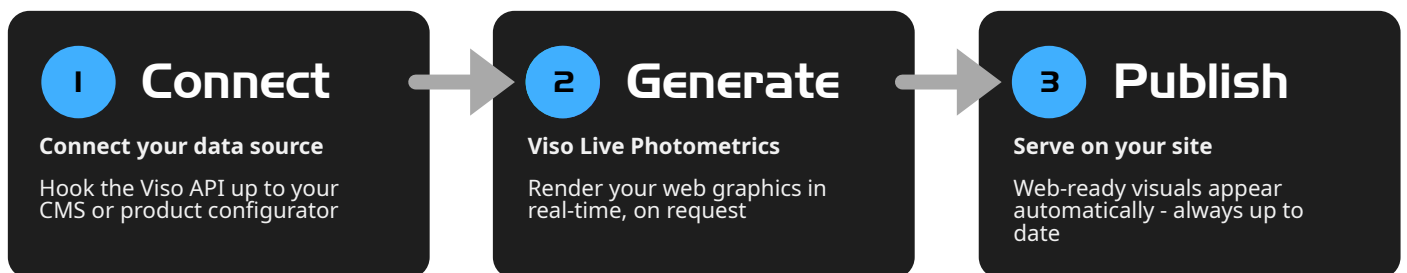

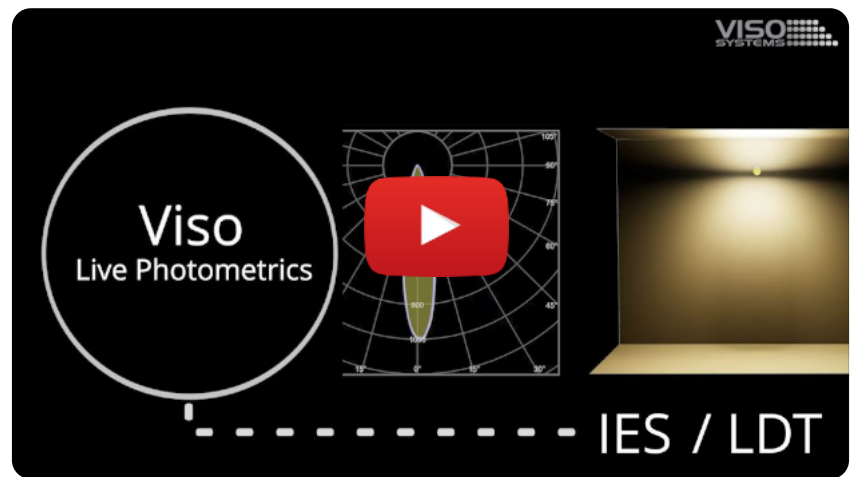

Eliminate the repetitive and manual work behind website photometric elements

- Say goodbye to pixelated, unappealing standard graphics
- Farewell to tedious, manual maintenance of thousands of graphics
- Away goes discrepancies between CMS data and lab results

How does this actually look?

Watch the YouTube video:
<https://youtu.be/ncEPUwH4HZA>

Responsive web components
Polar curves
Cone diagrams
Isolux diagrams
Interactive LuxiVerse 3D
Data tables
PDF reports and much more

How?

- Get a free demo meeting with Viso Systems
- Test the API in your own website sandbox using free demo elements
- Subscribe to the desired service level
- Provide IES/LDT files
- Design your own graphical templates following your corporate design using Viso's VREP editor.
- Implement the API solution with support from Viso Systems:
Connect the API to the IES/LDT data in your PIM/CMS
- Diagrams are created automatically in many formats
- Enjoy results throughout your website
